

# Media Converter

- Convert MPEG-4 Raw format to AVI format
- Converts multiple files at the same time
- Supports audio

- **Multiple MPEG-4 file conversion**

ACTi Media Converter converts MPEG-4 raw data files to AVI files. User may convert a single MPEG-4 Raw file or converts multiple MPEG-4 raw file at the same time. The conversion process also reserve original audio data information; when user uses Microsoft Media Player to playback the converted AVI file, the audio will be play at the same time.

Note that users need to install MPEG-4 software decoder (with DirectShow Filter interface) on the machine that is going to play AVI file; supported MPEG-4 software decoders are: FFDSHOW, DivX, Xvid.

## Specification
